

Exhibit Synopsis

Seven Schwabians and a Rake

A German Folktale

Exhibit Purpose

This exhibit is an experimental example of a digital approach to philatelic story telling. Viewing is more comfortable in an armchair reading on a tablet or iPad, rather than standing in front of a frame with aching feet. Pages are text heavy by design.

Exhibit Theme

The *Seven Schwabians* is a series of German folktales. First recited by Hans Sachs in 1545, the fables relate the many misguided adventures of seven Schwabian (southwestern Germany) would-be heroes who are oft portrayed as innocent or foolish. This type of stereotyping occurs in all cultures.

A few of the *Seven Schwabian* folk tales were collected by the Brothers Grimm and included in the second volume of the Grimm Fairy Tales. The brothers did not write all the stories in their works, but rather consolidated many tales commonly told historically by any number of storytellers.

Exhibit Scope

Scope is purposely limited to only one atory (the *Rake*) of many.

Exhibit Challenge

First, a number of post cards depict scenes from the folktales, most with similar designs for the more popular stories. To complete this story, unrelated cards were found to depict people, animals or events in the story line. The challenge is to find those items which relate the story and keep the same overall feel of the display constant, in this case simple and colorful illustrations. This was the tough part!

Second, such tales have been told and retold over many, many years with the teller adding or subtracting events, people or monsters as the creative mood strikes them. This version is loosely based on the original (as original as may be determined from sources available.) In the tradition of previous storytellers, I've embellished the story, made substitutions or added details as my fancy moved me.

Philatelic Elements

Elements are limited mainly to picture post cards as they best depict scenes from these tales. Additional items such as foodstuffs and other advertising cards may also be included. As this is a narrative, descriptions of the items themselves are not included, relying on the images to speak to the reader.

Material Availability

Most items are available on the internet, nothing rare, just difficult to find in some cases.
