

“One Library at a Time: The Vatican Apostolic Library” by Claudio Grande
Submitted by Larry Rosenblum
Synopsis

The Graphics Philately Association is interested in all means of graphic (non-verbal) communication, with an emphasis on printing, books, and libraries. This article discusses one of the oldest libraries in the world and shows many philatelic items related to the library and its history. It describes the four historical periods and then the library as it is today, including its catalog and various collections.

Members of the GPA are familiar with libraries in the United States, and this article expands on that with details about an overseas library.
